

3-terminal Filters

For Power Line

YFF-P Series

Type:	YFF15PC	1005 [0402 inch]*	Feed through filter
	YFF18PC	1608 [0603 inch]*	Feed through filter
	YFF18PH	1608 [0603 inch]*	Feed through filter
	YFF18PW	1608 [0603 inch]*	Feed through filter
	YFF21PC	2012 [0805 inch]*	Feed through filter
	YFF31PC	3216 [1206 inch]*	Feed through filter

* Dimensions Code JIS[EIA]

○ All specifications are subject to change without notice.

○ Conformity to RoHS Directive: This means that, in conformity with EU Directive 2002/95/EC, lead, cadmium, mercury, hexavalent chromium, and specific bromine-based flame retardants, PBB and PBDE, have not been used, except for exempted applications.

3-terminal Filters

Conformity to RoHS Directive
Lead-free Compatible

For Power Line

Overview of YFF-P Series

FEATURES

- Small and high-performance EMC components.
- Good attenuation characteristic in a wide band range.
- For large current (2A to 4A) applications

APPLICATIONS

For the power line of communication terminal devices, such as a smart phone, and AV and information devices.

○ Conformity to RoHS Directive: This means that, in conformity with EU Directive 2002/95/EC, lead, cadmium, mercury, hexavalent chromium, and specific bromine-based flame retardants, PBB and PBDE, have not been used, except for exempted applications.

○ Please contact our Sales office when your application is considered the following:

The device's failure or malfunction may directly endanger human life (e.g. application for automobile/aircraft/medical/nuclear power devices, etc.)

○ All specifications are subject to change without notice.

Overview of YFF-P Series

RECOMMENDED SOLDERING CONDITION

REFLOW SOLDERING

HAND SOLDERING

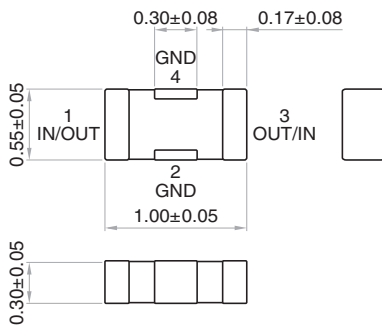

PRECAUTIONS FOR USE

- Before soldering, be sure to preheat components. The ΔT preheating temperature must be 150°C max. with attention paid to thermal shock.
- Natural cooling of components in the air is recommended. On the other hand, when dipping them in a solvent for purposes, such as cleaning, make sure that the temperature difference (ΔT) is 100°C.
- When performing hand soldering for circuit modification, apply the soldering iron to the copper foil area of the printed circuit board for 3 seconds or less. The temperature of the iron tip should not exceed 300°C.
- Use a wrist band to discharge static electricity in your body through the grounding wire.
- When incorporating the printed circuit board on which this product is mounted into a frame, etc., do not apply stress to the product through local bending of the board by tightening of screws, etc.

YFF-P Series YFF15PC Type(Feed Through Filter)

SHAPES AND DIMENSIONS

RECOMMENDED LAND PATTERN

* Make sure to connect the GND terminal of this product and the GND of the mounting circuit board by using through holes so that the distance between them is the shortest.
